To: Desert Eagle Users

The Desert Eagle is a semi-automatic pistol based on a non-adjustable gas system.

In order to function properly, only suitable ammunition can be used.

The following types of ammunition were found adequate for use in the Desert Eagle pistols.

This list is a recommended list only, other types of ammunition might function as well as any of these do.

Do NOT use LEAD bullets in the Desert Eagle pistols. Lead will fill and close the orifice holes in the barrel.

.44 Magnum - Mark I, VII, XIX
