

DESERT EAGLE RECOMMENDED AMMUNITION

RA0926

The Desert Eagle is a semi-automatic pistol based on a non-adjustable gas system. In order to function properly, only suitable ammunition should be used. The following types of ammunition were tested and found adequate for use in the Desert Eagle pistols. This list is a recommended list only, and other types of ammunition might function as well as these do.

CAUTION:

DO NOT USE LEAD BULLETS IN THE DESERT EAGLE. AN EXPOSED LEAD BASE WILL FILL AND CLOSE THE GAS ORIFICE HOLES IN THE BARREL. This could damage the gas system and possibly require replacement of the barrel. **Use jacketed bullets only such as JSP/JHP.**
